## MANAGEMENT DISCUSSION AND ANALYSIS

### F a c a R

#### *Total operating income*

For the six months ended 30 June 2018 (the “Review Period”), the total operating income of the Group amounted to RMB860,887,967.66, representing an increase of approximately 22.70% over that of the corresponding period of last year. It was mainly attributed to the active development of the intelligent terminal sales and service business during the Review Period.

#### *Gross profit margin*

The gross profit margin for the Review Period increased from approximately 24.05% to 25.44% as compared with the corresponding period of last year.

#### *Selling expenses*

Selling expenses for the six months ended 30 June 2018 was RMB20,215,782.33, representing a decrease of approximately 10.64% as compared with the corresponding period of last year. The decrease was mainly attributed to the increase in publicity of the Group by self-media resulted to reduction in business promotion expenses.

#### *Administrative expenses*

The administrative expenses recorded an increase of approximately 3.47% from RMB25,693,262.08 in the corresponding period of last year to RMB26,584,826.90 for the Review Period. The increase was mainly attributed to active expansion of business channels.

#### *Prepayments*

As at 30 June 2018, the Group’s prepayments amounted to RMB369,759,703.43, representing an increase of approximately 454.18% as compared to that of 31 December 2017. The increase was mainly due to the increases of prepayments of materials procurement and projects prepayments resulted by the rapid business development.

#### *Other payables*

As at 30 June 2018, the Group’s other payables were RMB112,605,234.66, representing an increase of approximately 189.74% as compared to that of 31 December 2017. The increase was mainly due to the declaration of final dividend of a total of RMB79,205.850 for the year of 2017 (based on 316,823,400 shares, RMB0.25 per share) during the reporting period.

### *Liquidity and Financial Resources*

The Group adopted stringent financial management policies and maintained a healthy financial condition. The Group's working capital (being current assets less current liabilities) as at 30 June 2018 was RMB1,798,240,009.10 (At 31 December 2017: RMB1,623,662,652.61).

As at 30 June 2018, the bank balances and cash of the Group amounted to RMB611,980,560.41 (At 31 December 2017: RMB763,119,652.92).

### *Capital Structure*

As at 30 June 2018, the total bank borrowings of the Group was RMB1,023,211,860.88 (At 31 December 2017: RMB424,400,000.00), which included secured bank borrowings of RMB70,990,000. During the period under review, the increase in bank borrowings is mainly in support of the rapid growth of the Group's business, especially the intelligent terminal sales business, and the funds obtained were mainly used for project procurement and prepayments for projects.

As at 30 June 2018, the registered and issued share capital of the Company was RMB316,823,400 which was divided into 91,800,000 H Shares and 225,023,400 Domestic Shares.

### *Pledge of Assets of the Group*

As at 30 June 2018, the Group had the following assets pledged:

- (i) The total book value of the Group's assets of RMB343,506,643.50 (including: investment properties of RMB219,390,000.00, fixed assets of RMB115,815,469.96, intangible assets of RMB8,301,173.54) were pledged to banks to secure outstanding bank loans of approximately RMB70,990,000.00.
- (ii) The bank deposits of RMB46,602,670.16 were pledged for projects bidding/projects in progress and banking facilities.

### *Employees*

As at 30 June 2018, the Group has an aggregate of 336 employees (At 30 June 2017: 357 employees). During the Review Period, the staff costs (including Directors' remuneration) was RMB27,793,577.74 (corresponding period of 2017: RMB30,732,095.96).

The salary and bonus policy of the Group is principally determined by the performance of the individual employee.

### *Gearing Ratio*

The gearing ratio (being bank borrowings less cash and cash equivalents divided by equity) of the Group as at 30 June 2018 was 23.19% (At 31 December 2017: Zero). This was mainly attributed to the increase of bank borrowings for the project procurement and project prepayments in support of the rapid growth of the Group's business, especially the intelligent terminal sales business.

### *Risk in Foreign Exchange*

The revenue and expenses of the Group were denominated in Renminbi. The Directors consider that the Group's risk in foreign exchange is insignificant.

### *Substantial Acquisition and Disposal and Significant Investment*

In the city intelligent transport business domain, the Group strengthened its capability to fulfil its core mission of offering comprehensive solutions. To this end, it continued to integrate elements such as data collection terminals for internet-of-things (IoT) and intelligent information management platforms, creating the basis for ecological transport services in intelligent cities. To support its user demand-oriented scheme, the Group conducted in-depth research on traffic model algorithms via both self-development and external cooperation. By forming two research teams dedicated to the big data model and software development, the Group further enhanced its understanding of the transportation sector. Meanwhile, the Group endeavored to shift its core competence from project implementation to an ability to seize on industry demand, analyze big data, and extend the application of big data analysis to new business segments such as vehicle operation. During the period under review, the Group's market competitiveness was prominently demonstrated when its Big Data Analysis Platform for Traffic Police was awarded the Excellent Solution Prize in the 5th Intelligent Transportation Cup.

In the customs logistic business domain, the Group continued to devote significant effort to integrating market resources, improving operating efficiency, and providing customers with quality solutions. It introduced innovations in the mobile internet customs clearance model with the launch of mobile logistics application services and resolved certain barriers pertaining to customs clearance logistics. These developments gained wide industry attention and enabled the Group to further expand its market. During the period under review, the Group implemented its building operation service platform. Also, its research and development project on a cloud storage service support platform for the Group's vast amount of IoT data was inspected and passed. These significant achievements in the fields of IoT data handling and cloud computing are creating a solid foundation for the technical application of large-scale IoT.

## **R a c a**

During the period under review, the Group participated in and promoted the NDRD's "Internet +" project, Provincial Economic & Information Commission's information and technology industrial project, the Provincial Intellectual Property Office's strategic project for corporate intellectual property, and the Provincial high-value patent cultivation project. A capital injection project undertaken by the Group for the development of a modern service industry (software) in Jiangsu Province was also inspected and passed during the aforesaid period.

During the period under review, the Group applied for 1 patent for invention and was granted patents for each of inventions and new utility models. As a participant in the national IoT basic standards working group led by the China Electronics Standardization Institute under the Ministry of Industry and Information Technology, the Group led the drafting of a "Internet-of-things Information Sharing and Exchange Part 4: Data Interface" national standard, which is expected to be completed and submitted in the second half of the year. The period under review also saw the Group receive the "Pan Gu Award" for innovative achievement from the China Electronic Information Industry, recognizing the Group's "application of the RFID security smart lock in the intelligent cross-border e-commerce IoT of customs". The award highlighted the high regard in which the Company's products are held by experienced peers,

a foreign academician of the Chinese Academy of Engineering, as a “strategic consultant of its relied entity, National Radio Frequency Identification Device (RFID) System Engineering and Technology Research Center”, to be responsible for procuring rapid development of the center.

## **F u t u r e**

In the second half of the year, in the intelligent transportation domain, the Group will continue to consolidate the sourcing of goods over the internet-of-things and the “internet +” informationalization of its management platform, and will provide big data-based data services related to transportation. It will act consistently to improve municipal and communal service product lines and create total solutions. The Group will also pursue innovation in new city transportation business activities, taking commercial vehicles as target customers of new “data+cash flow” business activities, providing safe operational data services, building up after-sales market-related services for commercial vehicles, creating a new profit model for intelligent transportation, and enhancing its intelligent transportation public service capabilities based on the intelligent city concept.

In the second half of the year, the Group’s customs logistics business will continue to consolidate its strengths while increasing its market share and improving customer satisfaction. It will draw upon new IT and internet-of-things technologies to realize interaction between customs data and service applications, and will pursue whole process visibility for the entire process of customs clearance logistics monitoring, the data service business and the service supply chain. This will ready the Group for the next step of providing quality services to import and export companies, and facilitating the reform and integration of monitoring and clearance to reduce enterprises’ logistics costs and help create an efficient and convenient customs clearance environment.

In the second half of the year, regarding intelligent logistics, the Group’s successful development of “Jiangsu Province Technical Standards for Vehicle Mounted Active Prevention and Control Terminals” will form a basis for providing technical and resource support for share-participating companies and partners and establishing a safety monitoring platform for hazardous chemicals logistics. This will further improve and consolidate the intelligent logistics ecology of Sample Technology. In the meantime, the Group will maintain its position in Jiangsu as it expands its business across China. In the years ahead, it will promote its accumulated technologies and experience in such sectors as IoT, internet of vehicles and internet+, assist regulatory authorities to enhance management standards for “Two-passenger and One-dangerous Vehicles”, improve industrial barriers, and continue to increase its overall competitiveness.
